

The team is currently working on a project called 'RootBeer' which comprises of a total of 17 Java files. Each file has been authored by a unique individual from the list of 16 authors provided below:

1. Matthew Rollings - 41 edits
2. Scott Alexander-Bown - 34 edits
3. Daniel Kutik - 10 edits
4. altvnn - 7 edits
5. Andy Barber - 3 edits
6. Mohammed Ezzat - 5 edits
7. Frieder Bluemle - 6 edits
8. Fi5t - 1 edit
9. mat - 9 edits
10. Ivan Vlasov - 2 edits
11. matthew - 2 edits
12. Slim Namouchi - 1 edit
13. Ali Waseem - 1 edit
14. BIOCATCH\Leon.Karabchevsky - 1 edit
15. vyas - 1 edit
16. leocadiotina - 1 edit

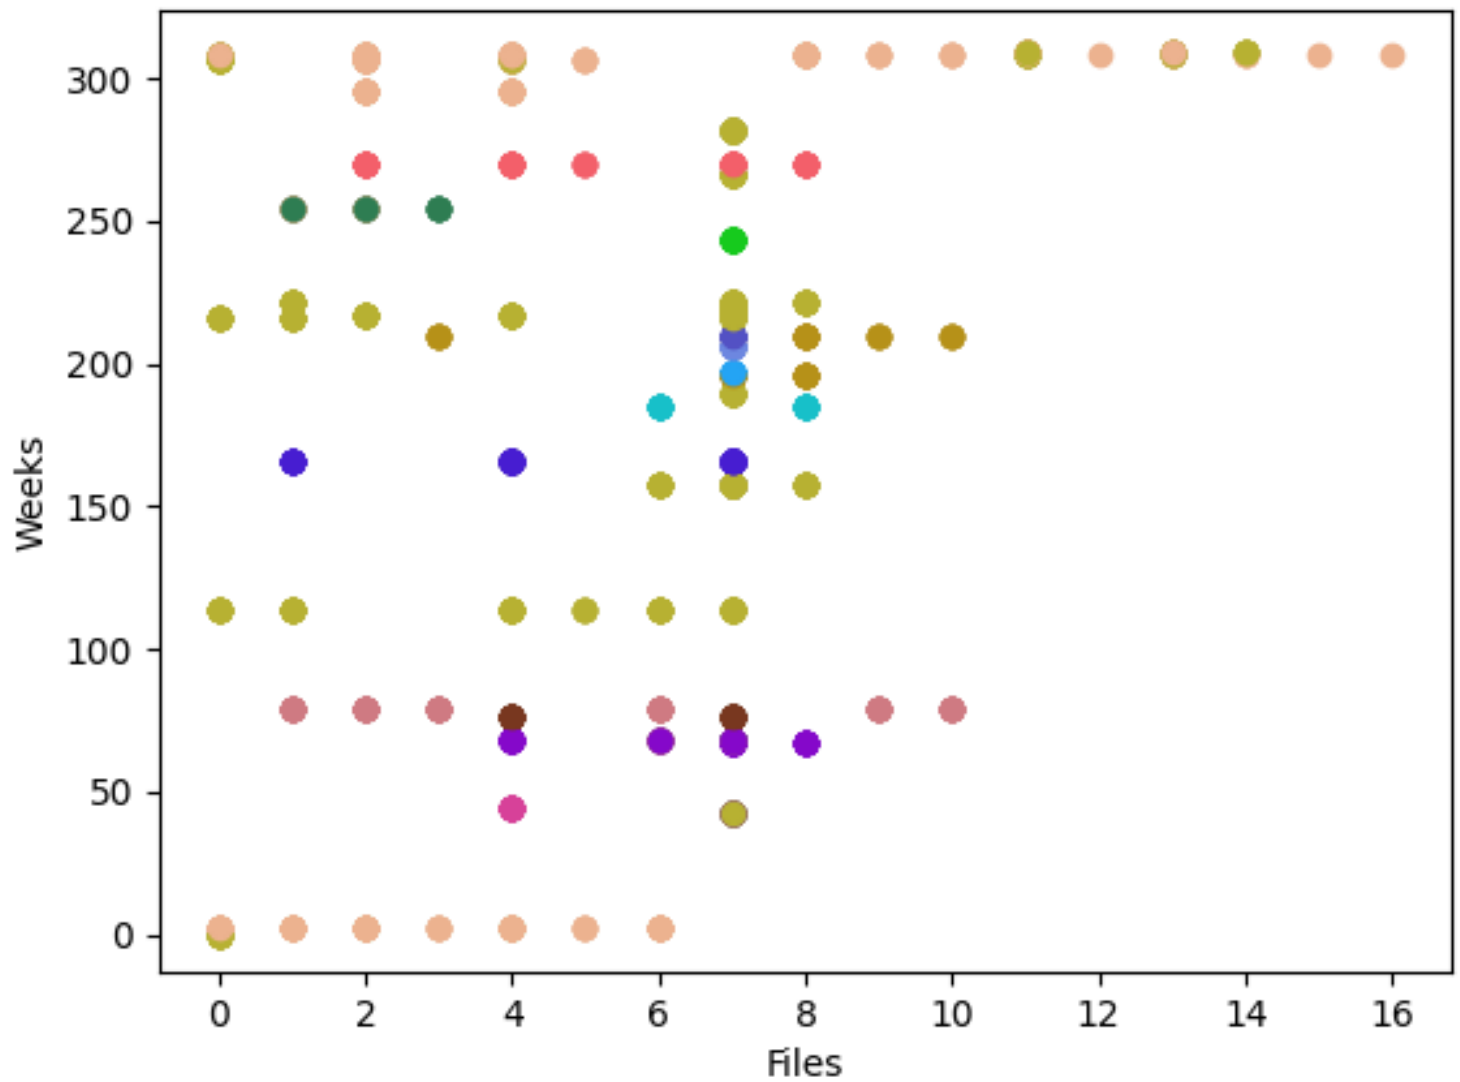

Matthew Rollings has the highest number of edited files at 41 and was also the last person to edit a Java file on 05/24/2021. Furthermore, there are 8 authors who have contributed to 2 or fewer files. Additionally, 6 authors, including Fi5t, Slim Namouchi, Ali Waseem, BIOCATCH\Leon.Karabchevsky, vyas, and leocadiotina, have only made changes to a single Java file, which suggests they may have left the project.

It is important to note that the information gathered is based on data analysis and not assumptions. Through this analysis, we can confidently state that the team is actively working on the development of an application named 'RootBeer'.

The git commands I found particularly useful in doing this lab are listed below:

- `git rev-parse --abbrev-ref HEAD`
- `git branch --show-current`

These commands will display the current branch name on the terminal.
